

Creating and logging in to your member account

The davisvision.com website gives you quick access to your vision benefits information. Member account information is shared by all covered family dependents. Your online member account includes useful tools allowing you to check eligibility, confirm who is enrolled under your plan, access your forms, find an in-network provider and also view your benefits.

Step 1

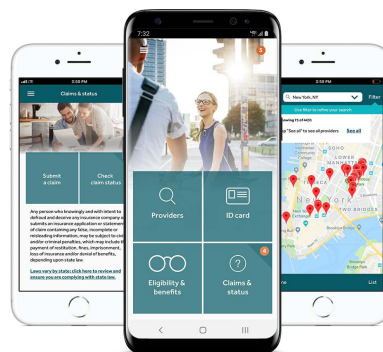

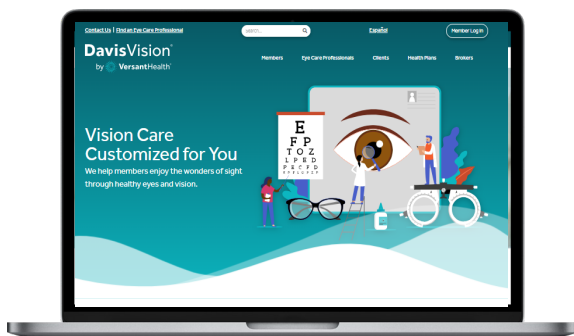

From any page on davisvision.com, select "Member" from the main page.

Step 2

If you have already set up your account, select "Member Log In" and enter your username and password. Otherwise, click "Create Account." Your login is your member ID. Your password must meet the minimum criteria as noted on the website.

Step 3

If you do not wish to create an on-line account you can still login using a client code to view your in-network providers and generic benefit coverage. Go to davisvision.com, select "Member" from the main page. From there select "Member Log In". Scroll down where it asks for a client code. Input number **4481**.

Need access to benefits on the go? We've got you covered.

Download our mobile app and log in using the same credentials from your member account for access to the same features found on our website.
